- Experience the school program in a new fun way, through practical games and exercises

Studing and practical exercises room

- Entertaining chemistry
- Science show
- Singing lessons
- Candle workshop

FORMAT EXAMPLE

Duration: 2 hours
Number: 2 groups

- Game-based learning
- Master-classes

Interactive installations - New technologies

Educational and entertaining games that develop motion skills, reaction time, imagination, regardless of the child's age.

Main interactive zones:

Magic Floor

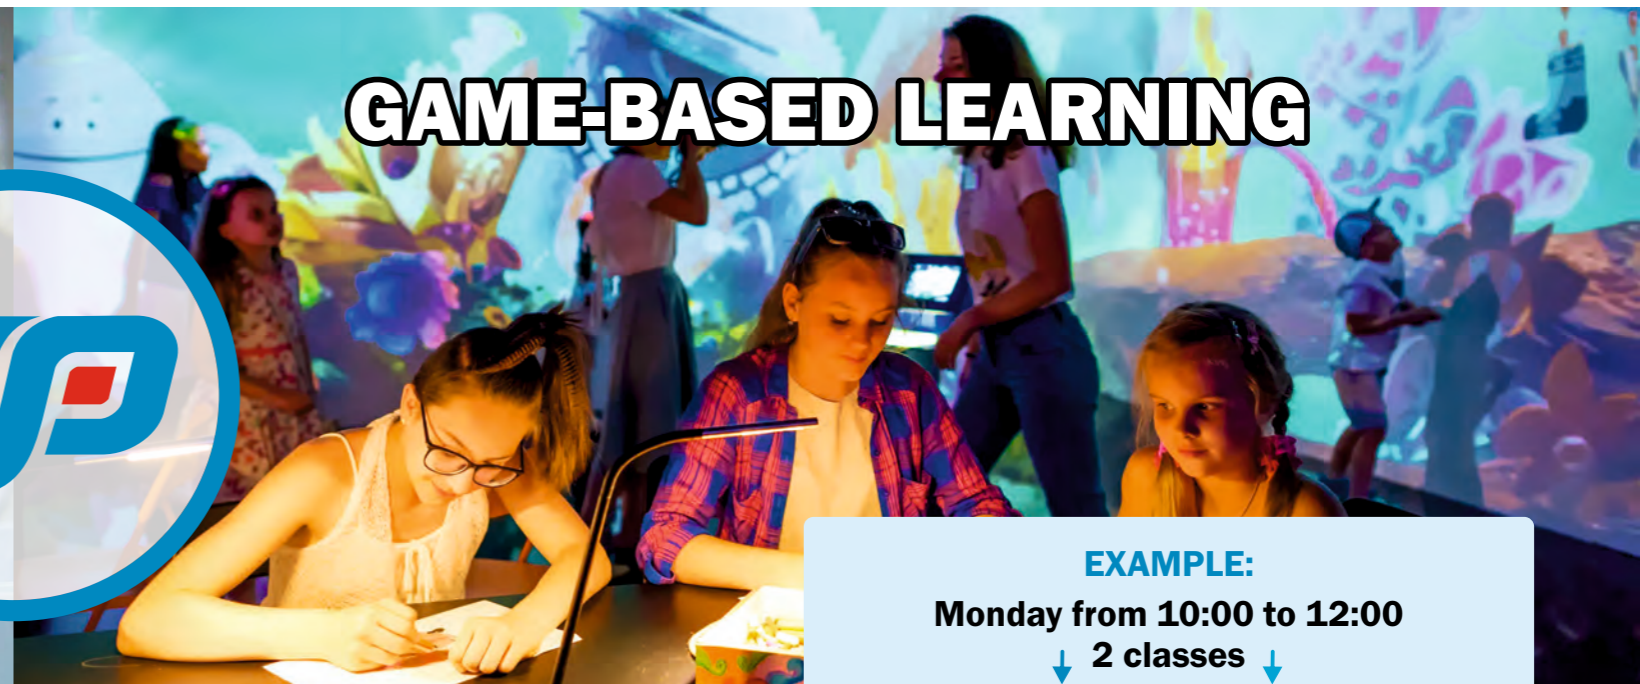

merges both educational and physical activities. The child develops skills in mathematics, music, memory, shape and color recognition.

Magic Trampoline

Stimulates childrens interest in sports, develops their physical abilities, coordination, endurance and reaction time.

PROFESSIONS OF THE FUTURE

GAME-BASED LEARNING

Room for team building and quests

A team meant to inspire leadership through quests. Children participate in various mental challenges and activities meant to inspire critical thinking skills.

Subjects taught through practical exercises

- Chemistry
- Physics
- Mathematics
- Information and communication technology
- Music (singing and other vocal skills)
- Various workshops where kids are able to develop their creativity

Magic Painting

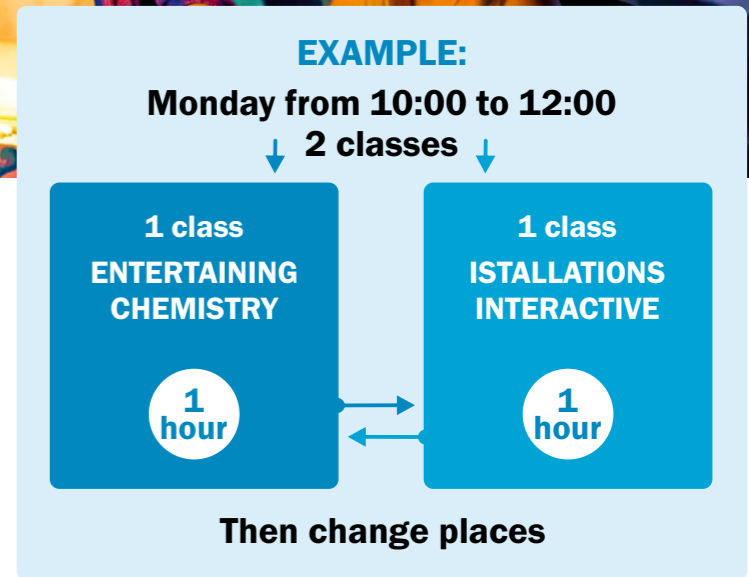

Stimulates the children's interests in drawing and immersing them in art. Also helps developing social skills.

Magic Swing

The game was developed by experts for the mental development of children. Enables them to develop logic, creativity, movement coordination, reaction time, attention and imagination.

Magic SandBox

Encourages creativity, freedom of expression and improves children's motor skills.

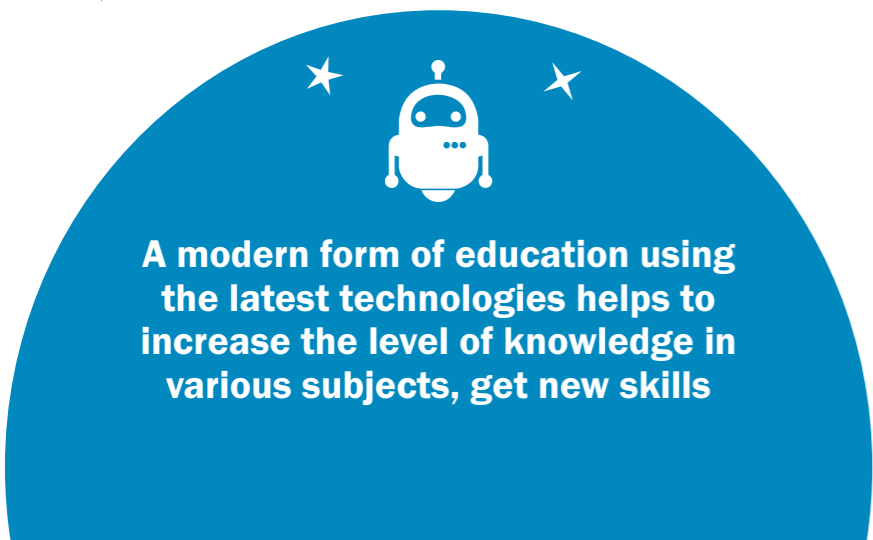

Magic Balls

Children learn how to work as a team and improve their communication skills.

Magic Graffiti

Stimulates the childs interest in drawing, expands the imagination.

ONLY STUDENTS ARE ON THE PLAYGROUND - TOTAL SAFETY
